

**Stuart Dean provides essential services and will continue to operate under state of emergency and shelter-in-place orders recently issued across the country.** In response to the Covid-19 crisis, we are pleased to announce our touch-point disinfectant service to assist in germ mitigation.

This service is aimed at disinfecting architectural touch-points we normally provide metal restoration and refinishing services to. We'll use a solution of 75% Isopropyl alcohol to wipe down high volume touchpoints including, but not limited to:

- Handrails
- Door Handles
- Security Turnstiles
- Security Desks
- Handicap Access Push Plates

It is important to note that a [70% Isopropyl alcohol solution is recognized by the CDC](#) as an effective means to disinfect surfaces.

**At Stuart Dean our priority is to maintain a safe workplace and encourage and adopt practices protecting the health of our employees, customers, and communities.** We recognize that the current state of National Emergency brought about by the COVID-19 coronavirus affects us all in ever evolving ways. We want to assure you that we are actively monitoring the situation and following best practices as outlined by the CDC and other governmental agencies in mitigating the spread of this virus.

Our efforts to support the safety of our customers and employees include ensuring stringent cleaning of our facilities, installing hand sanitizing stations, educating our employees with CDC postings of best practices and practicing social distancing when interacting with others including staggering the start-times of our crews. All unnecessary business travel has been cancelled.

We hope that conditions quickly return to normal and everyone stays safe and healthy. Thank you for your continued trust in Stuart Dean.

Sincerely,

Robert T. Cook  
CEO
